# 7th Conference of the European Ornithologists' Union 2009

(21-26 August 2009, Zurich, Switzerland)

The European Ornithologists' Union has been founded as an equal partnership among avian biologists across Europe to provide an international forum for the advancement of European ornithology in all its aspects. The bi-annual conferences provide ideal platforms to get in contact, exchange ideas and disseminate knowledge. The council of the EOU and the local organisers invite you cordially to join the 7th EOU conference to be held at the University of Zurich from 21-26 August 2009!

The conference aims at bringing together the full range of researchers in ecology, behaviour, evolution, physiology, morphology, systematics and conservation biology of birds to exchange ideas and to think about future research projects. Studies on birds still have a lot to offer both in basic and applied research. The challenges are there and together we can solve them!

Information on the conference location, accommodation, deadlines, registration fees, etc. are available at <http://www.eou2009.ch/>. You may also wish to contact the local organising committee at [info@eou2009.ch](mailto:info@eou2009.ch). Information on the Scientific Programme Committee, the general scientific programme, plenary talks and the submission of symposia and papers are provided at <http://www.ucc.ie/en/eou2009/>. Inquiries about the scientific programme should be addressed to [EOU2009Programme@ucc.ie](mailto:EOU2009Programme@ucc.ie).

We hope that you will contribute to and find interesting topics in the scientific programme. We are looking forward to meeting you in beautiful Zurich.
